

Correction to: Perioperative Stroke and Thirty-Day Hospital Readmission After Cardiac Surgeries: State Inpatient Database Study

Nada Alrifai^{a, c}, Laith Alhuneafat^{a, c}, Khaled AlRobaidi^b, Samir S. Al Ghazawi^c,
Parthasarathy D. Thirumala^{d, f}

The authors would like to make following correction to the published article: Perioperative Stroke and Thirty-Day Hospital Readmission After Cardiac Surgeries: State Inpatient Database Study, Journal of Clinical Medicine Research, 2022;14(1):34-44. doi: 10.14740/jocmr4647 [1].

In Table 1, in the comorbidities of variables column:

The number of peptic ulcer disease in perioperative stroke group should read “≤ 10”, instead of “4 (0.22)”;

The number of metastatic cancer in perioperative stroke group should read “≤ 10”, instead of “8 (0.44)”;

The number of acquired immune in perioperative stroke group should read “≤ 10”, instead of “3 (0.17)”.
